ONLINE COURSE

CE Marking

Do it yourself: CE-mark your machine step by step

Do you build or modify machinery? Learn which rules apply, which documents you need and how to affix the CE marking yourself, including the new Machinery Regulation.

4 hours
Study time, online at your own pace

Online tools
Reports straight into your CE file

Certificate
Automatically after the online exam

What will you learn?

1. **The new Machinery Regulation**
   What changes, incl. software, cybersecurity and AI
2. **Which rules apply?**
   Directives and regulations for your product
3. **Standards**
   Which harmonised standards apply
4. **Notified Body**
   When a notified body is required
5. **Safety requirements and risk assessment**
   Assessing requirements and recording risks
6. **Instructions for use**
   What they must legally contain
7. **Technical file**
   Which documents to draw up and keep
8. **Declaration, type plate and CE**
   Declaration of conformity and marking

What do you get?

- Video lessons explaining each step
- Online tools with reports for your file
- Risk assessment tool, online and in Excel
- Online exam and certificate
- Reference material and a CE expert

Who is it for?

Machine builders, designers and engineers, CE and compliance coordinators, and companies that build or modify machinery for their own use.

No specific prior education required. Available in English and Dutch.
